pentest_report_20250520_004336.pdf

Executive Summary:\n\nThis report outlines the results of a pentest conducted on the target server at http://localhost:3000.

The findings indicate that no vulnerabilities, open ports, or services were identified during the assessment.\n\n**Methodology**:\n\nA comprehensive scan was performed using industry-standard tools to identify potential weaknesses in the target system.

The scan included a review of network protocols, configuration, and software versions.\n\n**Findings**:

Vulnerabilities: No vulnerabilities were found.

Open Ports: No open ports were identified.

Services: No services were detected.

\n**Risk Assessment**:

\nBased on the findings, there is no risk to the system or its data.\n\n**Recommendations**:

Regular security updates and patching should be performed to ensure the system remains secure.

\nThis report will serve as a baseline for future assessments to monitor the system's security posture.
